TECHNOLOGY

Quest Diagnostics is the nation's largest provider of anatomic pathology testing, information, and services and offers one of the most comprehensive menus of cancer testing for the detection, diagnosis, and treatment of patients including both routine and esoteric immunohistochemistry (IHC) antibodies for both qualitative and quantitative image analysis.

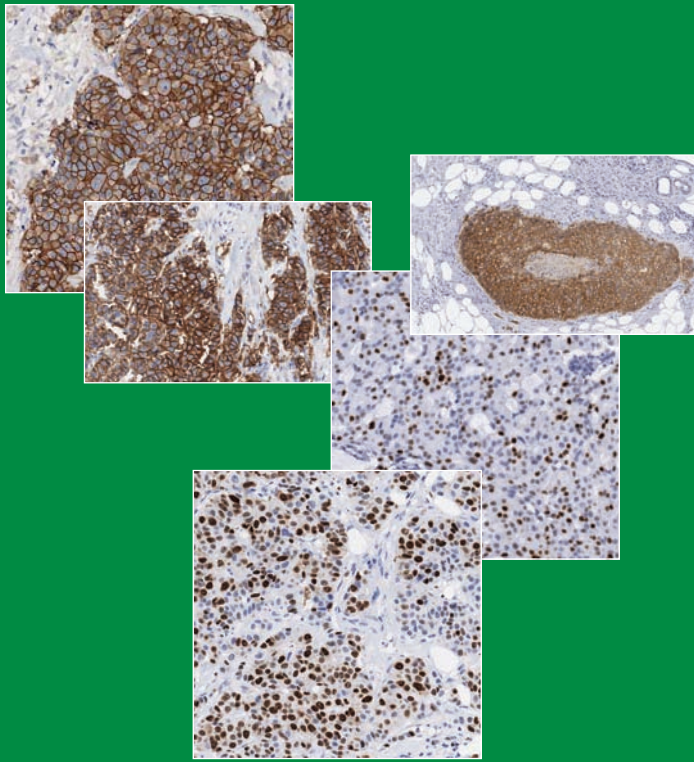

We know that IHC can be an extremely complex, yet valuable tool. That's why Nichols Institute, long known for its innovative research and development capabilities, developed InScape™ Virtual Pathology – **the future of IHC testing.**

InScape™ Virtual Pathology is a new and proprietary information management tool that provides pathologists with innovative and customized solutions for IHC testing.

- 1 Virtual Pathology is easy to use** – Easily navigated with just a few clicks of a mouse, you're able to view your digitally scanned images on-line
- 2 It enhances productivity** – InScape Virtual Pathology has been designed to assist the pathologist in making a timely and accurate interpretation with easy-to-use reporting tools that include FDA-cleared image analysis algorithms for ER/PR and HER2
- 3 It optimizes your connectivity** – Your high-resolution images are now available anytime, anywhere 24/7 via a HIPAA compliant and secure website.

With a comprehensive and expanding library of antibodies and customized panels, we are constantly evaluating new markers in an effort to better support you and help ensure your patients receive all of the benefits of the latest virtual imaging technology available in the industry.

Consultation

When you need help, Quest Diagnostics pathologists offer you an expert level of consult since they often see the most difficult diagnostic and prognostic dilemmas that face clinicians every day.

Our staff is experienced and knowledgeable with board-certifications in multiple sub-specialties that include using the latest innovation and technology from InScape™ Virtual Pathology. They are available for professional consultation and assistance to help the pathologist choose the most appropriate antibodies for analysis. In addition, they consult as a group to maximize best practices. This approach allows a commitment to you and your patients that goes beyond a single point of contact. Our ultimate goal is to maximize our result findings with the multiple technologies we use at our laboratories.

We offer you the complete solution – from screening to diagnosis to post-therapeutic monitoring. Quest Diagnostics Nichols Institute offers one of the most comprehensive enhanced anatomic pathology menus for the evaluation of cancer found in the industry.
